

BMP Application - Newton (85% Event)

BMPs **required** within shaded area.
BMPs **required** for an impervious/pervious ratio > 1.0
Site hydrologic soil group (HSG) must be decreased one soil group level (e.g. B to C) if existing soils not preserved (See Section 2.1)
BMPs may be required outside of shaded area if receiving waters have established TMDL or a sensitive waterbody

BMP Application - Newton (90% Event)

BMPs **required** within shaded area.
 BMPs **required** for an impervious/pervious ratio > 1.0
 Site hydrologic soil group (HSG) must be decreased one soil group level (e.g. B to C) if existing soils not preserved (See Section 2.1)
 BMPs may be required outside of shaded area if receiving waters have established TMDL or a sensitive waterbody
